
closed-form fit
TD-trained fit
$\widehat{G}_r / G_r$ read by the trained critic
$\widehat{G}_r / G_r$ allowed by the features
representation rank
11
6
2

random rewards
unit reward, P11
unit reward, R1
unit reward, R2
unit reward, R3
unit reward, R4
unit reward, R5
gap the trained critic reads
gap the features allow

$\widehat{G}_r / G_r$
representation rank
relative objective cost
FB, optimal rank d
rank d + residual direction (d+1)
objective above the optimal rank d+1 fit
